WHY HAIR FALLS OUT

Dandruff causes a feverish irritation of the scalp, the hair roots shrink, loosen and then the hair comes out fast. To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of Danderine drug store for a few cents, pour a little in your hand and rub well into the scalp. After several applications all dandruff disappears and the nair stops coming out,-(Adv.)

Eight years ago, I began to feel not quite so well as usual . . . I was not able to do anything. It seemed like I was dwindling away, and kept getting more puny every day. I was weak and pale and could not stand on my feet long . . . I had no doctor, but I knew by my feeling that I had womanly weakness.

After I decided to try Cardul, I bought one bottle. It seemed as if the very first few doses began to help me. I was surprised that any thing could begin to act so quickly. But it helped me right away. I know it did because I began immediately to get strong.

After I finished that first bottle, I bought another. When I had finished that second bottle, I was all right. I did not need a third bottle. I kept right on getting stronger until I was as strong as ever, and I have kept so ... Now I am as well and as strong and as able to do my work as I ever

was in my life." Try Cardul today .- (Adv.)
